BOND

PERMANENT OR TEMPORARY ADHESIVE SPRAY

DESCRIPTION

BOND permanent or temporary adhesive spray is a HIGH TACK aerosol alternative to pressure sensitive or permanent bonding. Its user friendly formula contains no chlorinated solvents, ozone depleters, or carcinogens. It sticks to almost any surface, and provides a clear, waterproof bond which is neat and strong. Eliminates costly waste and clean up of messy adhesive bottles.

This multi-use formulation allows for repositioning, removal, or permanent contact adhesion. It has thousands of uses for schools, offices, industry, doctors offices, retail store windows, graphic arts departments, shipping departments, and simply wherever messy adhesives in bottles are used. Replaces scotch tape and some sealing tapes.

SPECIFICATIONS

Odor	Solvent
Color	Dries Clear
Spray Pattern	Mist spray
Flammable	Yes

USES / BENEFITS

FOR USE IN

- Graphic areas
- Advertising Agencies
- Shipping
- Retail Stores
- Schools
- Churches
- Offices
- Supermarkets
- Drug Store

PRECAUTIONS

CAUTION

Keep Out Of Reach Of Children

CONTENTS UNDER PRESSURE
FLAMMABLE.

Contains Hexane and Acetone. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperature above 120°F may cause bursting. If excessive inhalation, remove to fresh air immediately. If swallowed do not induce vomiting. Call doctor. Keep out of eyes. If eye or skin contact occurs, flush with plenty of water.

DIRECTIONS FOR USE

FOR TEMPORARY BOND

As a pressure sensitive application, spray on surface, allow to dry several minutes, then apply with light pressure.

FOR PERMANENT BOND

Spray both surfaces evenly. Allow to dry for 1 to 2 minutes. Press together firmly and allow to set under pressure.

Always Clean Spray Tip

After use, turn can upside down and spray for 2 seconds to clear tip to prevent clogging. Always wipe off excessive buildup on tip - while it's fresh. If dried out, remove with a degreasing fluid.
